Question 2

3D movies are everywhere, and theme parks even have 4D or 5D movies. A new cinema company follows the trend and builds a new, super-dimensional movie theatre, with as many dimensions as every movie needs! Today we will see the awesome Sci-Fi blockbuster:

"The Document Vector of the
Vector Space Model"

What determines how many dimensions this
movie needs?

What determines the dimensions of a document vector in the Vector Space Model?
