# Question 1

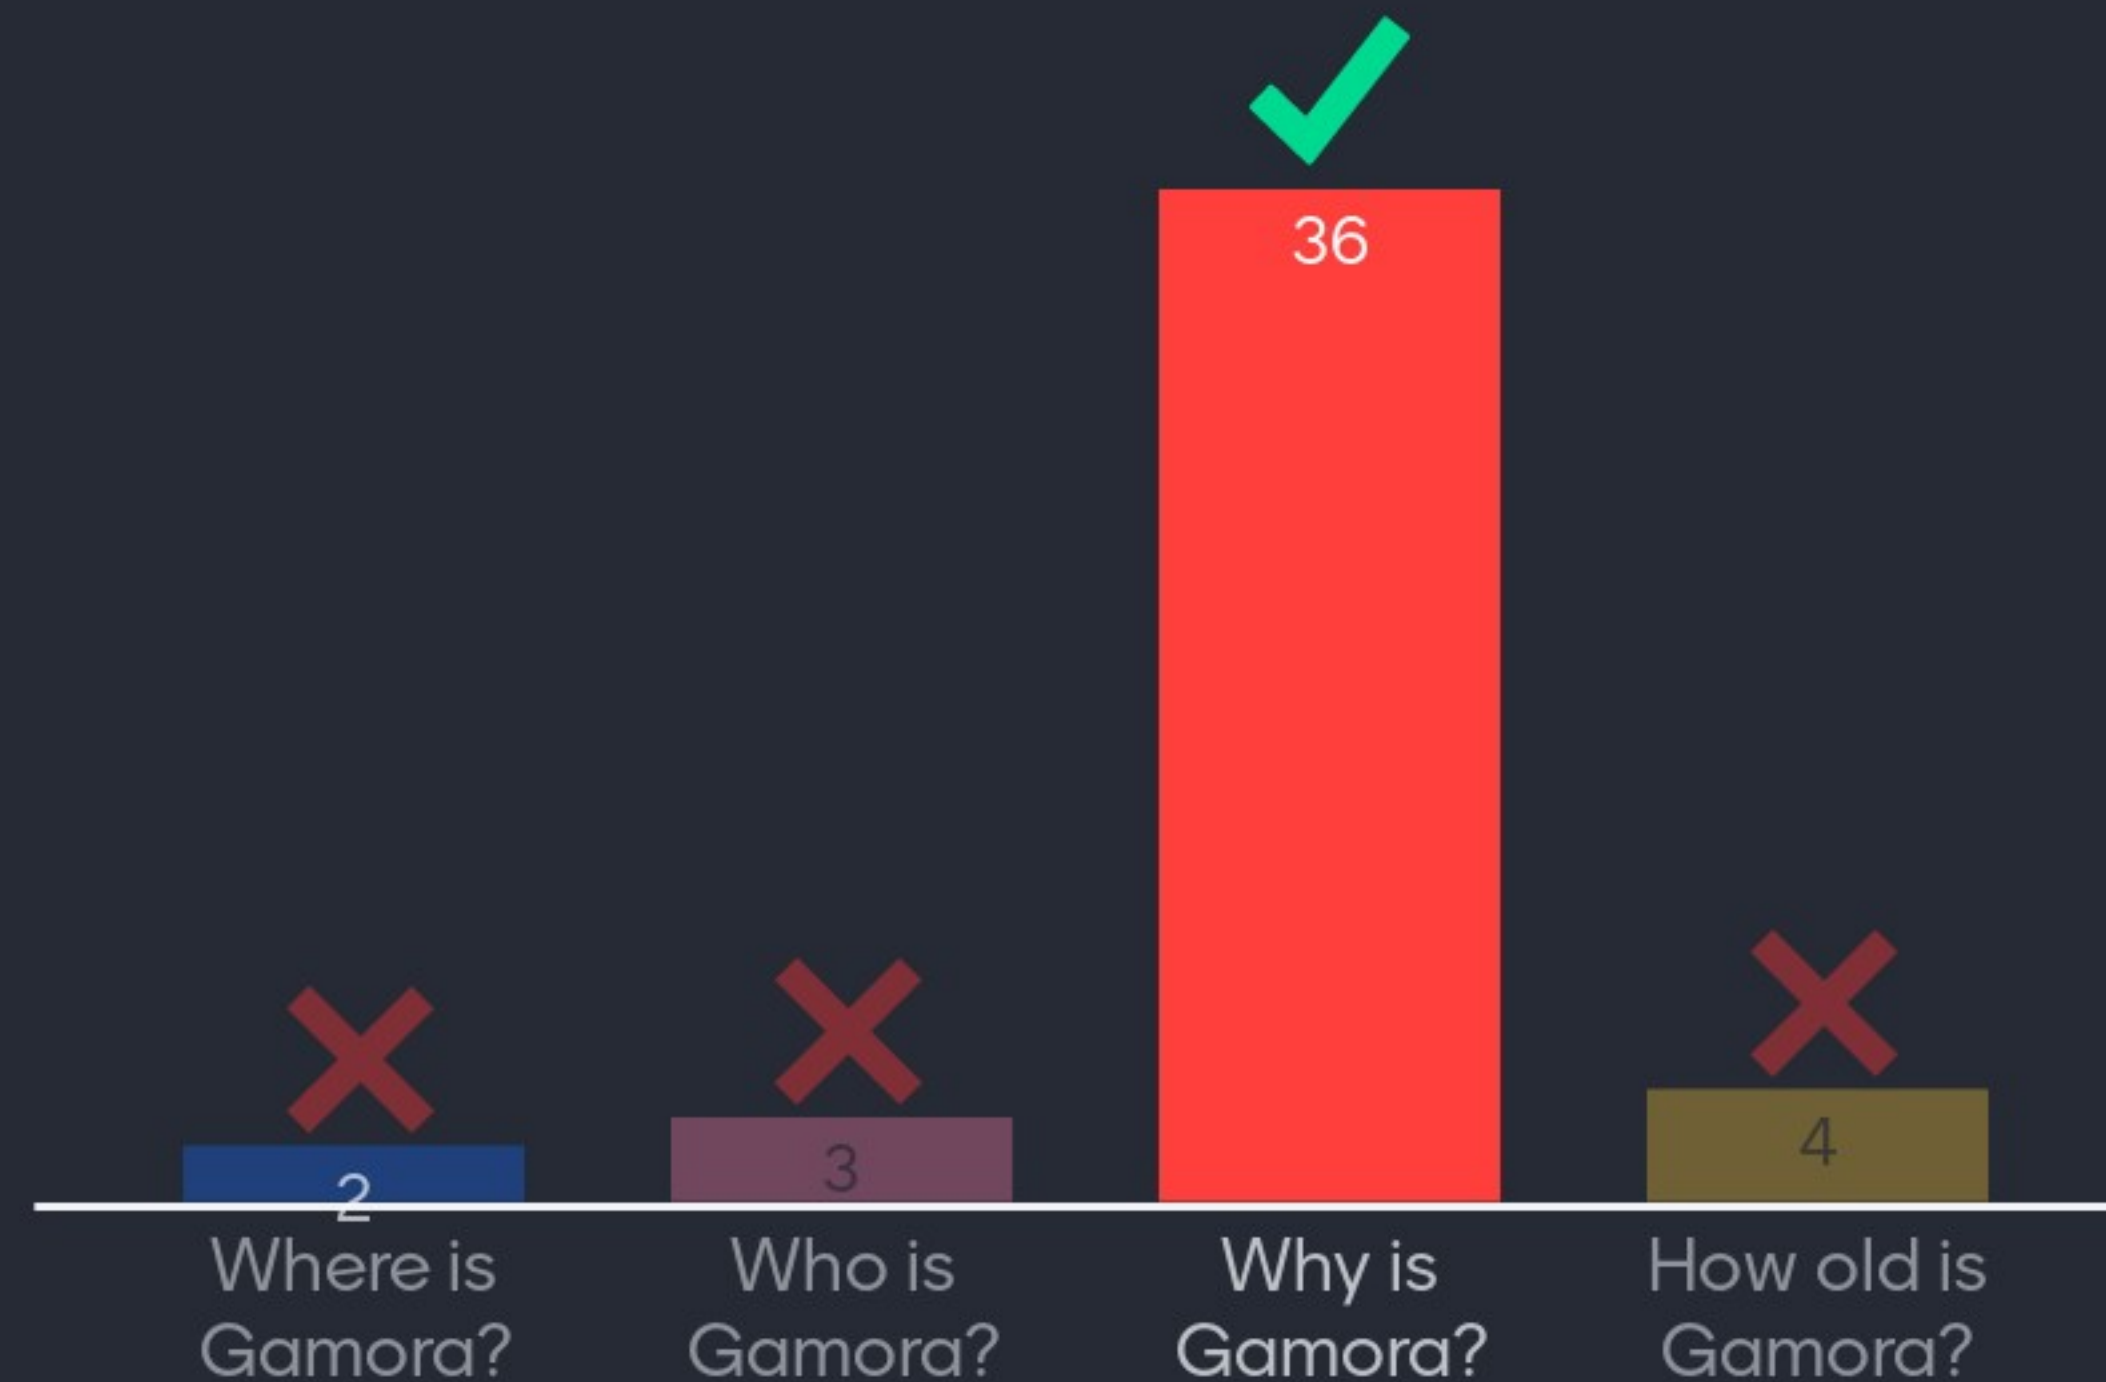

The earth is once again in great danger. An army of android attackers has landed, ready to conquer humanity once and for all. Only Peter Quill aka. Starlord, a hero from the mighty Avengers, is there to save the day. Before the epic battle, his friend Gamora gives him secret information about the enemy:

"Peter! The enemies are, in fact, not Androids, but FACTOIDS!"

"Oh yeah! Let's shoot NON-FACTOID questions!"

Which NON-FACTOID question can beat the enemy?

# Which question can beat the FACTOID ARMY?

## Question 2

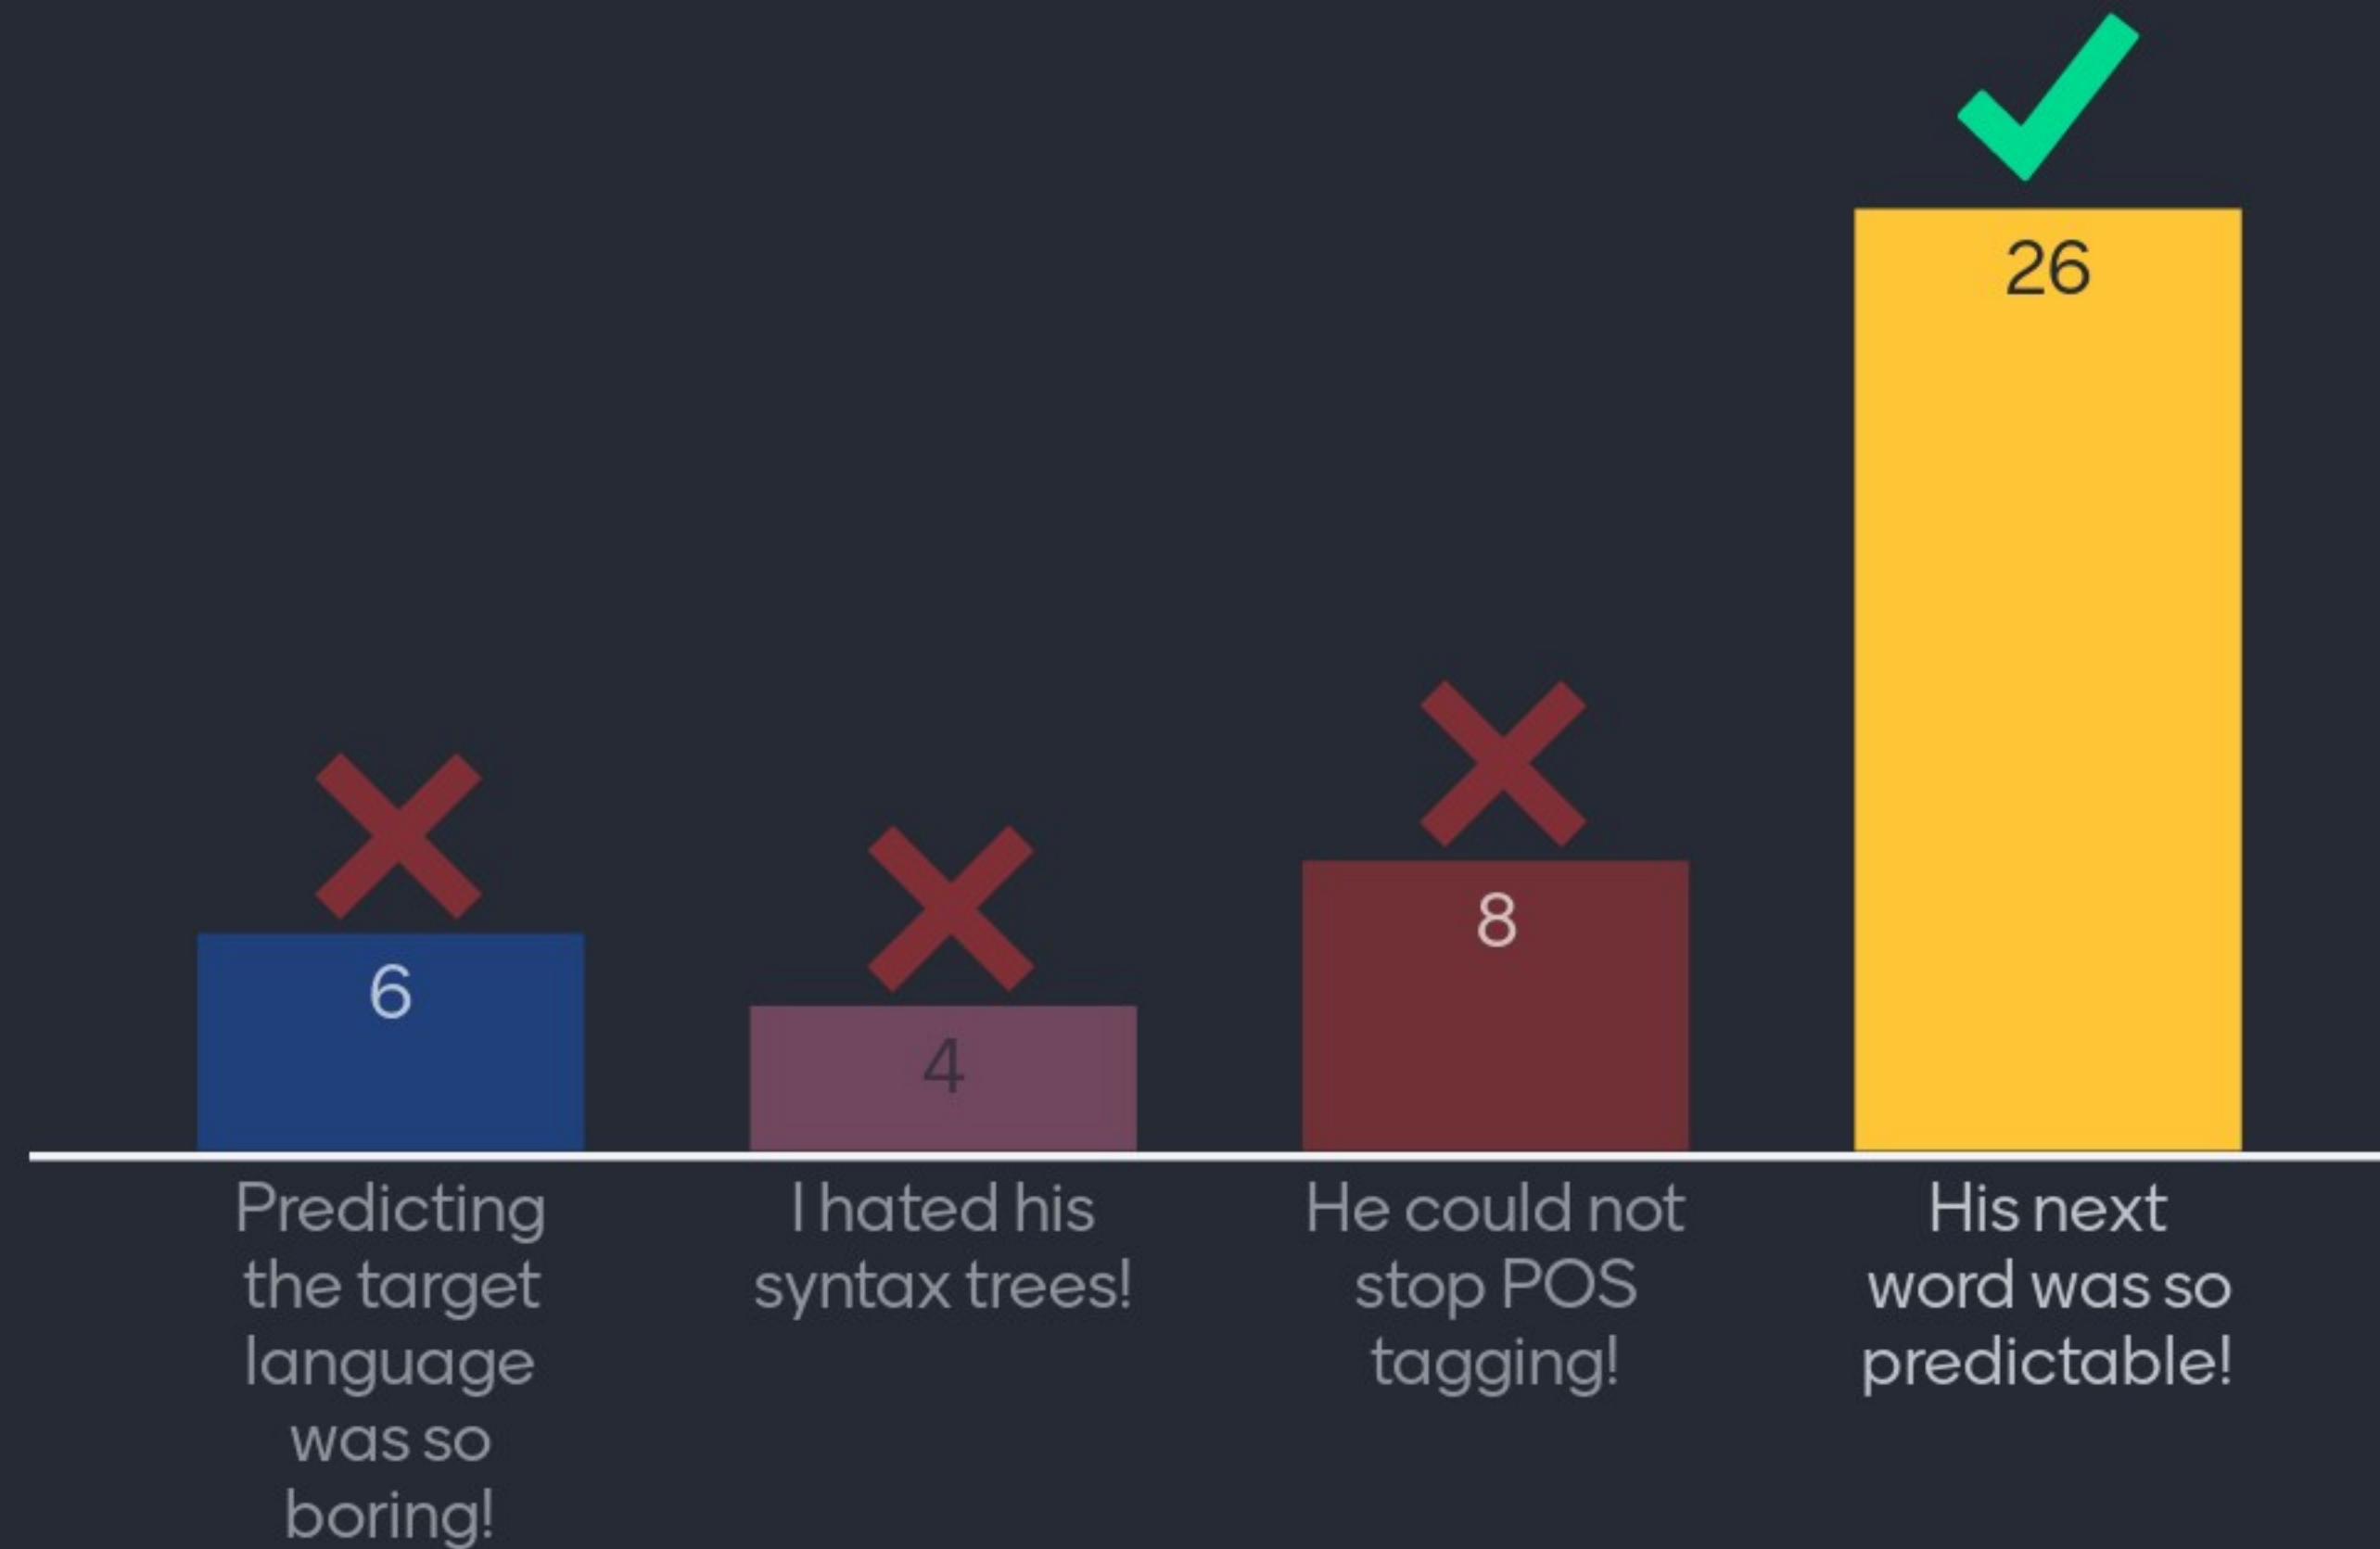

It was one of these dark November days, where the only light was the reflection of broken neon signs through my dirty window, and the only joy was the cheap whiskey, which let me forget my miserable life at least for a minute.

My client kept talking and talking, one of these damn Language Models. I hated him from the moment he entered my office, and the main reason was...

# Why did I hate the Language Model?
