Question 1

The two hackers ASCIIX and OPENIX intercepted another encrypted message. The robots communicate in messages that resemble an IOB annotation schema on noun phrases. This was their last code:

B-NP O B-NP I-NP I-NP

Can you find the corresponding clear text?

(Which of the following sentences follows this IOB schema?)

Question 2

You are a level 69 thief, although you prefer to be called a "treasure retriever".

A customer approaches you with an interesting job offer: Retrieve 400 secret documents from the NLP (National Library of Puzzles).

You accept this offer, break into the library and take as much as you can.

"Haha", laughs the quest-giver, "let me see what you brought..."

(Type your answer as a decimal number. You can use . (dot) or , (comma) if needed)

Question 3

Humanity has just recovered from the attack of the evil LEMMATIZER - but already the Earth is threatened again. A monstrous mutation, a terrible terror, a vile villain: the PREPROCESSOR!

Immediately Batman is on the scene, shouting "I am Batman" at the terrible henchman.

However, the PREPROCESSOR is not impressed by this call, and applies an impressive combination of tokenization, stemming, and POS tagging! How does the PREPROCESSOR distort Batman's catchphrase?

(What is the result of "I am Batman" after tokenization, stemming, and POS tagging?)

Question 4

Finally - the day has come when you can fulfill your dream, join the mages guild, and become the most famous magician! You decide to join the guild as a prabability-mancer. Probably.

The initiation test looks pretty simple - the guild master shows you a table with some statistics of the local dungeon.

Then, he asks you the following question...

(Type your answer as a decimal number. You can use . (dot) or , (comma) if needed)
